

PHILIPPE WIENER LECTURE IN CAMBRIDGE

Biographical Note

Vinciane Debaille, FNRS research associate at ULB since 2010, specialises in geochemistry and cosmochemistry. Her research interests encompass the formation of the solar system and the evolution of planets, including the ancient Earth, using the isotopic composition of terrestrial and extraterrestrial rocks. She has participated in 3 missions to Antarctica, and 1 mission in the Atacama desert in Chile to collect meteorites. She received an ERC Starting Grant in 2013.
